Project Topic idea IMM 200

1) <u>Website:</u> face masks! (where to buy them, what kind is the best, what is the right size to wear, how to wear them right and wrong)
   <u>App:</u> face masks! (where to buy them, what kind is the best, what is the right size to wear, how to wear them right and wrong)

2) The targeted audience for website would be all ages.

3) Yes, a final project for IMM 120. The topic for my website was Cupcakes and Cakes. It has three pages, has a navigational bar at the top.

4) The targeted audience for mobile app would be all ages.

5) Yes. I created some apps using MIT app inventor for DPR 101. I made a game barcode scanner app. The app has two screens. the first screen has two buttons one for the barcode scanner itself and one for the history of barcodes. The second screen has a button for a list of previous games you have scanned, a reset list button and a back to scanner screen button, which takes you back to the first screen.
